

JERICHO OIL CORPORATION
MANAGEMENT DISCUSSION AND ANALYSIS (“MD&A”)
For the quarter ended March 31, 2018
(Expressed in CDN\$ unless otherwise indicated)

This document is current in all material respects up to May 29, 2018.

INTRODUCTION

Jericho Oil Corporation (“Jericho” or the “Company”) was incorporated on October 21, 2010 under the Laws of British Columbia and was listed on the TSX Venture Exchange after completion of its initial public offering on May 29, 2012. The Company’s name, formerly Dakar Resource Corp., was changed on February 27, 2014. The Company trades on the TSX Venture Exchange under the symbol “JCO”, and on the United States OTC exchange under the symbol “JROOF”. The head office, principal address and records office of the Company are located at Suite 350, 750 West Pender Street, Vancouver, British Columbia, Canada, V6C 2T7.

The Company incorporated a subsidiary, Jericho Oil (Kansas) Corp., in the State of Delaware, United States, on January 27, 2014, and another subsidiary, Jericho Oil (Oklahoma) Corp., also in the State of Delaware, on February 18, 2015.

OVERALL PERFORMANCE AND RESULTS OF OPERATIONS

We are an independent crude oil and natural gas company engaged in the exploration, development and production of crude oil and natural gas. We derive most our revenue, operating income, and cash flows from the sale of crude oil and natural gas and expect this to continue in the future. Our operations are primarily focused on exploration and development activities in the Mississippi Lime, Woodford Shale and Hunton formations in Central and Northeast Oklahoma. The Company has approximately 55,000 net acres of developed and undeveloped acreage.

Joint Venture and Equity Investment Operating Statements to March 31, 2018

The presentation below reflects the operations in the currency in which revenue prices are denominated. It also presents the combined joint ventures and Equity Investments as viewed by investors, lenders, and American readers of the financial performance of the combined entity. (Please also refer to the Company's share of investment in the Joint Ventures in Canadian dollars under IFRS in Note 7 of the annual financial statements.)

Statement of 100% joint venture partners' income (US\$)

	Three Months Ended	
	March 31, 2018	March 31, 2017
Oil (BBL)	39,861	36,583
NGL (BBL)	16,638	11,168
Natural gas (MCF)	106,633	45,505
Total sales (BOE)	74,271	55,335
Average daily sales (BOE/d)	825	615
Operating Results Per BOE:	USD\$	USD\$
Oil sales (\$/BBL)	\$ 61.17	\$ 51.93
NGL sales (\$/BBL)	25.81	23.46
Natural gas sales (\$/MCF)	2.53	3.17
Total sales (\$/BOE)	42.24	41.68
Lease operating expenses (\$/BOE)	\$ 18.61	\$ 29.79

Note: Operating results for first quarter 2018 include additional revenues of approximately \$119,000 net to the joint venture interests related to prior-period revenue distributions of natural gas and NGL sales post-acquisition. Additional volumes reported in first quarter 2018 related to this item include 18,096 MCF of natural gas and 4,294 barrels of NGLs, equivalent to 7,310 BOEs. Absent this adjustment, natural gas volumes would have been 88,537 MCF, and NGL volumes would have been 12,344, resulting in 66,961 BOEs for the quarter and average daily sales of 744 BOEs per day. Additionally, the sales price per BOE would have been \$46.85, and lease operating expense per BOE of \$20.64.

Statement of 100% joint venture partners' income (US\$) (continued)

Jericho Oil Corporation
Management's Discussion and Analysis
For the Three Months Ended March 31, 2018

The following table presents a reconciliation of 100% Joint Venture partners' income to the Company's share of Joint Venture income to March 31, 2018, based on IFRS.

Three Months Ended March, 31, 2018	Eagle Road	Lurgan	Buckmanville	Rstack Walnut	Total
100% Net income (loss) in US\$	(191,519)	93,522	(223,441)	30,884	(290,554)
100% Net income (loss) in CDN\$	(242,214)	118,277	(282,587)	39,060	(367,464)
Jericho's ownership	50%	50%	50%	26%	
Jericho's share of net income (loss) in US\$	(95,760)	46,761	(111,721)	8,168	(152,551)
Jericho's share of net income (loss) in CDN\$	(121,107)	59,138	(141,293)	10,330	(192,931)

Note: The Company's interest in Buckmanville was increased from 25% to 50% on October 1, 2017. The Company acquired 11% interest of RSTACK Walnut on September 1, 2017. The Company increased its interest to 31% on December 29, 2017. Jericho's interest was subsequently reduced to 26.5% on January 4, 2018 upon the contribution of additional capital by its Joint Venture partner to fund development pursuant to the two new joint ventures.

2018

First Quarter Results

On January 16, 2018 the Company through its STACK Joint Venture (STACK JV) entered into an agreement to swap a portion of its undeveloped acreage in Blaine and Major County with Staghorn STACK LLC ("Staghorn"). As part of the agreement, Jericho through its STACK JV elected to participate in the drilling of the Wardroom 19-13-12 (Section 12-19N-13W). The Wardroom achieved a peak 24-hour rate of 957 oil-equivalent barrels ("BOE") per day (68% oil) at 211 Boepd per 1,000 ft. The 30-day normalized rate (IP30) for this well is 770 BOE per day (67% oil). The STACK JV owns a 47% working interest in the well.

On January 24, 2018 the Company through its STACK JV entered into a farm-in agreement to participate in the drilling of between two and five horizontal wells in Major County, near the Company's core STACK operating area, with a private operator. At the STACK JV's option and upon the drilling and completion of two standard-lateral (4,500') horizontal wells targeting the Osage formation, the STACK JV will earn a 50% interest in approximately 6,000 net leasehold acres. The STACK JV has elected to participate in the drilling of the first scheduled Osage well, under the Farm-In Agreement, and pay its proportionate working interest share of costs related to drilling and completion (47.5% WI / 37.8% NRI to STACK JV). This well has been drilled and completed and is currently in flow-back.

During the quarter there was a series of financings;

- (1) January 9, 2018, the Company closed a non-brokered private placement and issued 3,784,946 units at \$0.60 per share for gross proceeds of \$2,270,968. Each unit comprises one common share and one half of a warrant, exercisable into one common share at \$0.60 for the period of 24 months from the date of closing.
- (2) During January 2018, a total of 8,625,394 warrants were exercised at a price of \$0.60 for total proceeds of \$5,175,236.
- (3) January 12, 2018, 260,416 warrants exercisable at \$0.60 expired unexercised.

(4) March 20, 2018, a total of 398,166 warrants were exercised at a price of \$0.60 for total proceeds of \$238,900.

On April 23, the Company announced it had retained Trapeze Capital Corporation to provide market making services in accordance with TSX Venture polices.

Fourth Quarter 2017 Results

On October 1, 2017 the Company purchased an additional 25% of Jericho Buckmanville Oil LLC ("Buckmanville") for approximately US\$3,500,000. With this purchase the Company now holds a 50% interest in Buckmanville.

On November 2, 2017, the Company, through its investment in RSTACK Walnut, LLC. ("Walnut", or "RSTACK JV"), a private company, closed the acquisition of an additional 76 acres (100% held-by-production) in the oil window of the Anadarko Basin STACK play in Oklahoma contiguous to its current position.

On December 28, 2017, the Company fully exercised its option to increase its ownership in its RSTACK JV to 31% for US\$6,000,000.

The Company continues to build upon its initial STACK investment with 2018 plans of drilling multiple horizontal wells in the play to further delineate its acreage position. As part of this strategy, and subsequent to December 31, 2017, the Company's RSTACK JV entered into an agreement with Staghorn STACK, LLC (Staghorn) to swap a portion of its undeveloped acreage in Blaine and Major County, Oklahoma. As part of the agreement, RSTACK Walnut owns a 46.87% working interest with a 37.5% net revenue interest in the Wardoom well which has been drilled by Staghorn in 2018. The Wardoom was completed in February of 2018 and achieved a peak 24-hour rate of 957 oil-equivalent barrels ("BOE) per day (68% oil) at 211 Boepd per 1,000 ft. The projected 30-day normalized rate (IP30) for this 4,518 ft perforated lateral well is 770 BOE per day (67% oil). Additionally, Jericho's RSTACK JV entered into a farm-in agreement with Armor Energy in January 2018 to participate in the drilling of between two and five horizontal wells in Major County. The RSTACK JV has the option upon the drilling and completion of two standard-lateral horizontal wells to earn a 50% interest in approximately 6,000 net leasehold acres. As part of this agreement, the RSTACK JV expects to invest approximately US\$2.5 million for the first well which is currently waiting on completion.

In connection with the above transactions and in anticipation of capital needs, Jericho's RSTACK joint venture partner increased its capital commitment in January 2018. Post commitment, Jericho holds a 26.5% interest in the RSTACK JV.

The Anadarko Basin STACK play will be Jericho's primary focus in 2018 as it will look to expand its position in the play as well as continue to prove up the various stacked formations. Jericho will also look to strategically divest non-core assets if the opportunity presents itself.

Third Quarter 2017 Results

On September 1, 2017, Jericho invested US\$3 million to purchase shares in RSTACK Walnut, LLC. in the Anadarko Super Basin STACK play in Oklahoma. This investment represents approximately 11% ownership of RSTACK Walnut. The RSTACK JV acquired an interest in 9,400 net surface acres in the oil window of the Anadarko Basin STACK play in a highly contiguous block located in Blaine County, Oklahoma.

Jericho's pilot programs, as noted in the second quarter are ongoing. The results from the initial re-stimulation well was below expectations as there was a mechanical failure in the well casing. The second test well initial results were mixed with a portion of the stimulation program showing promising but inconclusive results. The second pilot program focused on the Company's Seminole Uplift Resource Extension (SURE) in Seminole and Potawatomie County. This pilot program will initially test the potential of the lower Woodford Shale in the SURE region. The first test well, which started flowing in the late spring has produced over 6,800 Barrels of Oil and 1450 MCF of gas through September 30th. The second well had good shows but due to a lack of water infrastructure is temporarily shut in. Jericho's Geology and Engineering team will continue to study the viability of the lower Woodford's commercial potential.

Overall the third quarter results were below expectations due to a series of lightning strikes at two multi-well tank battery installations. The strikes will not have any long-term impact and all operations were restarted and new tank batteries installed by quarter end. There will be some fourth quarter installation follow-up work associated with these lightning strikes, but all the wells impacted have been returned to production.

The three joint venture companies, Jericho Buckmanville Oil, LLC, Eagle Road Oil, LLC, and Lurgan Oil, LLC were in breach of the leverage covenant with respect to the Facility for the third quarter of 2017 with the lender East West Bank. East West Bank granted a waiver with respect to the breach and agreed to re-set the leverage covenant to restart in the fourth quarter of 2017 and has taken no other action against the joint venture companies.

During the third quarter, the borrowing based was reaffirmed at \$12 million following the regularly scheduled semi-annual redetermination. However, on November 2, 2017 the borrowing base was voluntarily reduced under the joint Senior Secured Revolving Credit Facility (the "Facility") from US\$12 million to \$10 million to reduce unnecessary fees associated with unused borrowing commitments.

Second Quarter 2017 Results

During the quarter ending June 30, 2017, the Company began two pilot programs. The first is a modern re-stimulation program designed at improving yields on existing, idled wellbores within the Company's Pawnee County assets. Improved completion techniques have advanced rapidly since these wells were completed in the beginning of 2013 by a previous operator. The Company has approximately 40 idled horizontal wellbores which may prove to be potential candidates for the re-stimulation program. The other pilot program focuses on the Company's Seminole and Pottawatomie County assets. The program is designed to prove the viability of potentially productive oil and gas bearings zones within existing vertical wellbores that cover a large majority of the Company's acreage. We are in the early stages of the process of both programs and are evaluating their results.

During the second quarter, the Company's borrowing base facility with East-West Bank was increased to \$12 million. The additional capacity increases the Company's undrawn committed funds under the facility to over \$6 million.

In May, the Company re-entered a drilled uncompleted vertical well in its Oaktree asset to test the lower Woodford. The test will be followed by a test in the upper Woodford. These tests are an effort by the Company to better understand the formation in the area in advance of completing the horizontal lateral acquired in the PostRock Energy acquisition.

First Quarter 2017 Results

During the quarter ending March 31, 2017, the Company began the implementation of its produced Natural Gas generator system. This system will utilize a series of natural gas-powered generators to run about 25-30% of the production in the Searight Field. The implementation is expected to reduce power costs by for the area by approximately 15-20% and increase run time. This implementation was the result of a year-long test run on a single well. That well ran without interruption, other than scheduled maintenance in 2016 with no overhead power costs.

In March 2017, in accordance with the Company's risk management strategy, the Joint Venture Entity, Jericho Buckmanville Oil LLC. ("Buckmanville), under agreement with Cargill, Incorporated, through its Cargill Risk Management Business Unit ("Cargill"), added to its existing oil and natural gas derivatives by entering into a series of new contracts.

For the period June 2016 through December 2017, Buckmanville entered into a fixed for variable price swap agreement with Cargill covering 6,775 MMBtus of Natural Gas production at \$3.104 per MCF. For the period January 2018 to March 2019 Buckmanville entered a series of collar contracts for 135,714 MMBtus of its engineered natural gas volumes. The contract provides for a floor of \$2.80 and a ceiling of \$3.07 per MCF.

With respect to its oil production, Buckmanville entered into a series of collar contracts covering the period August 2017 to July 2018. These contracts provide for a floor price of \$45 and a ceiling price of \$54.10. The oil production covered by these agreements for this period was 26,671 barrels. For the period August 2018 through March of 2019, the contracts provide for a floor price of \$45 and a ceiling of \$53.75. In addition to this collar for the August 2018 to March 2019 period, Buckmanville also purchased a \$60 call option. This call option will allow Buckmanville to participate in the appreciation of oil prices above \$60 a barrel on its covered production. The cost for the \$60 call was \$3.37 per barrel for 39,625 barrels.

Gross production for the quarter increased 2% over Q4 2016, with oil production flat quarter over quarter and gas production up slightly as the result of the Company's ongoing efforts to clean and rehabilitate older wells.

ENVIRONMENTAL LIABILITIES

We recognize that there are concerns over the potential environmental effects of developing oil and gas projects. We are researching methods to improve extraction and processing to enhance the sustainability

of our projects. We accrue environmental and reclamation obligations over the life of our oil and gas production operation.

OFF-BALANCE-SHEET ARRANGEMENTS

As of the date of the MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

SELECTED FINANCIAL INFORMATION

SUMMARY OF QUARTERLY RESULTS (CDN\$)

Quarter Ended	3/31/2018	12/31/2017	9/30/2017	6/30/2017	3/31/2017	12/31/2016	9/30/2016	6/30/2016
Gain/(Loss) for the period	(1,045,214)	(570,677)	(3,448,361)	(847,710)	(1,148,028)	3,135,659	(1,326,514)	607,861
Basic and diluted loss per share	(0.01)	(0.07)	(0.02)	(0.01)	(0.01)	0.02	(0.02)	0.01

During first quarter 2018, the Company recorded a loss of \$1,045,214 compared to a loss of \$1,148,028 in first quarter 2017. The comparable decrease in income was primarily a result of higher general and administrative expense related to increased investor relations activity compared with first quarter 2017. The Company's share of income from equity investments was also lower during first quarter 2018 compared with 2017. Despite higher realized oil prices in 2018, the joint venture's increased revenues were more than offset by the combination of higher depletion and general administrative expenses compared with the same period of 2017.

During fourth quarter 2017, the Company recorded a loss for the period of \$570,677 compared with a gain of \$3,135,659 for the same period of 2016. The decrease in income for the fourth quarter 2017 was primarily a result of losses recorded from the Company's share of losses from its investments in joint ventures in 2017. In 2017, two of the Company's joint ventures recorded significant non-cash impairment charges. In contrast, the Company recorded significant bargain purchase gains during the fourth quarter of 2016. In addition, the impairment losses recorded by the joint ventures were partially offset by deferred tax recovery gains related to both the impairments and prospective changes in U.S. corporate tax laws enacted at the end of 2017.

The net loss for the quarter ended September 30, 2017, was \$3,448,361 compared with \$1,326,514 in the same quarter in 2016. Contributing substantially to this difference was a loss in foreign exchange of \$1,063,888 as against a \$196,659 foreign exchange gain in 2016, reflecting an upward move in the Canadian dollar against the US dollar. Stock compensation expense was \$801,124 compared with \$613,547 in the same period in 2016. Legal fees of \$89,223 (2016 - \$40,375) and transfer agency and filing fees of \$69,033 (2016 \$7,742) were higher in the current third quarter compared with 2016, as the Company was successful in raising equity funding.

The net loss for the quarter ended June 30th, 2017 comprised mainly a foreign exchange loss of \$339,446 (2016 - \$1,390,412 gain) and investor relations cost of \$40,761 (2016 \$110,440) and legal fees of \$117,012 (2016 \$74,366). The Company recorded stock compensation expense \$34,892 (2016 \$0) for bonus shares vesting. The second quarter also saw more travel costs \$25,875 (2016 \$7,744) as the Company increased its marketing scope.

The net loss for the quarter ended March 31, 2017, of \$1,148,028 was higher than the same quarter in the previous year (2016 - \$874,974), due substantially to the non-cash cost stock compensation for stock options in the quarter of \$358,291(2016 - \$0). Also, a foreign exchange loss of \$173,301 compared with \$101,299 contributed to the difference. The Company recovered legal costs of \$19,444 currently compared with expenses of \$47,437 in the first three months of 2016.

The net gain \$3,135,659 for the quarter ended December 31, 2016 includes year-end adjustments of share of income from joint ventures of \$5,662,629 and impairment of petroleum properties of \$1,125,386. The net loss was also a result of a deferred tax expense recognized in the quarter of \$1,470,000 due to the difference between accounting and tax value of investments in joint ventures.

The net loss for the quarter ended September 30, 2016 of \$1,326,514 is substantially due to a foreign exchange gain \$196,659 in the current quarter. Also, the company issued stock options during the quarter amounting to \$613,547 in stock compensation expense.

The net gain for the quarter ended June 30th, 2016 comprised mainly a foreign exchange gain of \$1,390,412, offset by expenses for investor relations of \$110,440 and legal fees \$74,366. The Canadian dollar dropped against the US dollar and the increased value in US assets led to a gain on translation.

SELECTED ANNUAL INFORMATION

The following table shows selected financial information for the years ended December 31, 2017, 2016, and 2015:

	Year ended 31-Dec-17	Year ended 31-Dec-16	Year ended 31-Dec-15
Revenue	391,431	410,235	678,711
Net income (loss)	(6,014,776)	1,542,032	(1,099,358)
Net income per share	(0.07)	0.02	(0.02)
Cash	5,292,783	5,045,170	1,675,131
Total assets	42,916,838	27,523,020	19,793,963
Total current financial liabilities	244,493	362,850	175,275

LIQUIDITY AND CAPITAL RESOURCES

The activities of the Company, principally the acquisition and development of prospective oil and gas properties, are financed through the completion of equity transactions such as equity offerings and the exercise of stock options and warrants, credit financing and cash flow from production.

There is no assurance that future equity capital will be available to the Company in the amounts or at the times desired by the Company or on terms that are acceptable to it, if at all. The Company has increasing but limited operating revenues and therefore must utilize its current cash reserves, funds obtained from the exercise of warrants and other financing equity or credit financing to maintain its capacity to meet ongoing operating activities.

Liquidity requirements are managed based upon forecast cash flows to ensure that there is sufficient working capital to meet the Company's obligations. The Company's liquidity as at the date of the MD&A is sufficient to meet the Company's corporate, administrative and commitments for the next twelve months, notwithstanding any unexpected events. The Company's main funding requirements are for its development of its Oklahoma oil interests and corporate overheads. While the Company has been successful in raising such financing in the past, its ability to raise additional equity financing may be affected by numerous factors beyond the Company's control, including, but not limited to, adverse market conditions and/or commodity price changes and economic downturn. There can be no assurance that the Company will be successful in obtaining any additional financing required to continue its business operations.

The following section details the capital raises the company has achieved in first quarter 2018 and during 2017.

On January 9, 2018 the Company closed a non-brokered private placement of 3,784,946 units at a price of \$0.60 per unit for gross proceeds of \$2,270,968. Each unit is comprised of one common share and one-half warrant with each full warrant entitling the holder to purchase one common share of the Company at a price of \$0.60 per share for a period of 24 months from closing.

During first quarter 2018, 9,023,560 warrants were exercised at \$0.60 per share for proceeds of \$5,414,136.

In August 2017 the Company closed a non-brokered private placement of 12,596,420 units at a price of \$0.45 per unit for gross proceeds of \$5,668,389. Each unit is comprised of one common share and one-half warrant with each full warrant entitling the holder to purchase one common share of the Company at a price of \$0.60 per share for a period of 36 months from closing.

On September 6, 2017 the Company closed a non-brokered private placement of 22,033,557 units at a price of \$0.48 per unit for gross proceeds of \$10,576,287. Each unit is comprised of one common share and one-half warrant with each full warrant entitling the holder to purchase one common share of the Company at a price of \$0.60 per share for a period of 36 months from closing.

During the year ended December 31, 2017, 400,000 stock options were exercised at an average price of \$0.26 for gross proceeds of \$105,000.

On September 30, 2017, 75,000 warrants were exercised at \$0.60 per share for proceeds of \$45,000.

During the year ended December 31, 2017, a total of 300,000 bonus shares vested, and the Company recorded a share-based payment expense in the amount of \$139,568.

TRANSACTIONS WITH RELATED PARTIES

Key management are the officers and directors of the Company. The aggregate value of transactions and outstanding balances relating to key management personnel and entities over which they have control or significant influence were as follows:

	Three Months Ended	
	March 31, 2018	March 31, 2017
Management fees	\$ 143,139	\$ 89,800
Directors' fees	1,500	5,500
Share-based payments	-	70,816
	\$ 144,639	\$ 166,116

At March 31, 2018, included in accounts payable and accrued liabilities is an amount of \$1,500 payable to directors of the Company (2017 - \$Nil). These types of amounts are due on demand and have no specific terms of repayment.

NEW ACCOUNTING STANDARDS

New accounting standards adopted effective January 1, 2018:

- a) IFRS 2 – Share-based payments
- b) IFRS 15 – Revenues from Contracts with Customers
- c) IFRS 9 – Financial Instruments

a) IFRS 2, Share-based Payments

The Company adopted IFRS 2 Share-based Payments which clarifies the classification and measurement of share-based payment transactions. This includes the effect of vesting and non-vesting conditions on the measurement of cash-settled share-based payments, share-based payment transactions with a net settlement feature for withholding tax obligations, and a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled.

b) IFRS 15, Revenue from Contracts with Customers

The Company adopted IFRS 15 'Revenue from Contracts with Customers on January 1, 2018. IFRS 15 establishes a comprehensive five-step framework for the timing and measurement of revenue recognition. The adoption of IFRS 15 was not material to our revenues or operating income (loss) or to our consolidated balance sheet because our performance obligations, which determine when and how

revenue is recognized, are not materially changed under the new standard. Revenue associated with our contracts will continue to be recognized as control of product is transferred to the customer.

c) IFRS 9, Financial Instruments

The Company adopted IFRS 9 "Financial Instruments" on January 1, 2018. IFRS 9 replaces IAS 39 – "Financial Instruments: Recognition and Measurement". IFRS 9 reduces complexity in the classification and measurement of financial instruments. The adoption of IFRS 9 did not impact the Company's consolidated financial statements.

Accounting standards and amendments issued but not yet adopted

IFRS 16, "Leases" will be effective for accounting periods beginning on or after January 1, 2019. This standard sets out a new model for lease accounting, bringing off-balance sheet leasing arrangements onto the balance sheet. The Company intends to adopt IFRS 16 in its financial statements for the annual period beginning on January 1, 2019 and does not anticipate that the adoption of IFRS 16 will have a material impact on the Company's financial statements due to the nature of its operations.

MANAGEMENT OF CAPITAL

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern. The Company does not have any externally imposed capital requirements to which it is subject. As at March 31, 2018, the Company considers capital to consist of all components of shareholders' equity. The Company manages the capital structure and adjusts it considering changes in economic conditions and the risk characteristic of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares, or dispose of assets to increase the amount of cash on hand.

To facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

At this stage of the Company's development, to maximize ongoing development efforts, the Company does not pay out dividends.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing instruments with maturities of 90 days or less from the original date of acquisition.

The Company expects its current capital resources to be sufficient to carry its exploration and development plans and operations through the next 12 months. Cost control measures have been implemented and best efforts will be made to raise additional capital.

FINANCIAL INSTRUMENTS AND RISK

As at March 31, 2018 and December 31, 2017, the Company's financial instruments consist of cash and cash equivalents, accounts receivable, and accounts payable. The Company believes that the recorded

values on the consolidated balance sheets of cash equivalents, accounts receivable and accounts payable approximate their current fair values because of their nature and relatively short maturity dates or durations and current market rates for similar instruments.

The Company thoroughly examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. Where material, these risks are reviewed and monitored by management. There have not been any significant changes from the previous year as to how these risks are reviewed and monitored by management. The types of financial instrument risk exposures and the objectives and policies for managing these risks exposures is described below:

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company's cash and cash equivalents are held at a large Canadian financial institution in interest bearing accounts. The Company has no investments in asset-backed commercial paper. The Company's accounts receivable consists mainly of oil sales and purchase taxes remitted from the Government of Canada. The Company is exposed to a significant concentration of credit risk with respect to its trade accounts receivable balance because all its oil sales are with one counterparty. However, the Company has not recorded any allowance against its trade receivables because to-date all balances owed have been settled in full when due (typically within 60 days of submission).

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company manages liquidity risk through its management of capital as outlined in Note 13 to the consolidated financial statements. The Company had cash at March 31, 2018 in the amount of \$5,531,492 (December 31, 2017 - \$5,292,783) to meet short-term business requirements, and strategic investments.

At March 31, 2018, the Company had current liabilities of \$289,403 (December 31, 2017 - \$244,493). Accounts payable and accrued liabilities are due within the current operating period.

Contractual undiscounted cash flow requirements for financial liabilities as at March 31, 2018, are as follows:

	<1 month	1-3 months	4 month - <1 year	2-4 years	Total
Accounts payable and accrued liabilities	289,403	-	-	-	289,403
	289,403	-	-	-	289,403

Market risk

Market risk consists of interest rate risk, foreign currency risk and price risk. These are discussed further below.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has no interest-bearing obligations at March 31, 2018. The risk that the Company will realize a loss because of a decline in the fair value of the cash equivalents included in cash and cash equivalents because of lower interest rates is insignificant.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates.

The Company is exposed to foreign currency risk to the extent that the following monetary assets and liabilities are denominated in US dollars at March 31, 2018:

Cash and cash equivalents	USD\$	3,298,319
Receivables		34,193
Accounts payable and accrued liabilities		(105,387)
Net exposure	USD\$	3,227,125
Canadian dollar equivalents	CDN\$	4,161,055

The result of sensitivity analysis shows an increase or decrease of 10% in US\$ exchange rate, with all other variables held constant, could have increased or decreased the net loss and comprehensive loss by approximately CDN\$416,106 or US\$322,713.

Price risk

The Company's profitability and ability to raise capital to fund development of oil properties is subject to risks associated with fluctuations in oil prices. Management closely monitors oil prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Exploration, Development, and Production Risks

The acquisition of leasehold interests and the selection of prospects for oil and natural gas drilling, the drilling, ownership and operation of oil and natural gas wells, and the ownership of non-operating interests in oil and natural gas properties is highly speculative. There is no certainty that prospects will produce oil or natural gas or commercial quantities of oil or natural gas. Additionally, the amount of time it will take to recover any oil or gas is unpredictable. Oil and natural gas operations involve many risks that even experience, knowledge and careful evaluation may not be able to overcome. The long-term commercial success of the Company depends on its ability to find, acquire, develop, and commercially produce oil and natural gas reserves.

Without the continual addition of new reserves, any existing reserves the Company may have at any time, and the production there from, will decline over time as such existing reserves are exploited. A future

increase in the Company's reserves will depend not only on its ability to explore and develop properties it may have from time to time, but also on its ability to select and acquire suitable producing properties and prospects. No assurance can be given that the Company will be able to continue to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, management of the Company may determine that current markets, terms of acquisitions and participation or pricing conditions make such acquisitions or participations uneconomic.

There is no assurance commercial quantities of oil and natural gas will be discovered or acquired by the Company. Further, completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. Delays and added expenses may also be caused by poor weather conditions affecting, among other things, the ability to lay pipelines or otherwise transport or market hydrocarbons. In addition, ground water, impenetrable substances, various clays and lack of porosity and permeability may hinder or restrict production or even make production impractical or impossible. While diligent field operations and effective maintenance operations can contribute to maximizing production rates over time, production delays and declines from normal field operating conditions cannot be eliminated and can be expected to adversely affect revenue and cash flow levels to varying degrees.

Operational Dependence

An unrelated party operates all the producing wells in Kansas. Because of the Company's lack of exclusive control over the operation of the assets or their associated costs, the Company's financial performance could be adversely affected. The Company's return on assets operated by others therefore depends upon several factors that may be outside of the Company's control, including the timing and amount of capital expenditures, the operator's expertise, the approval of other participants, and the selection of technology and risk management practices.

Regulatory

Oil and natural gas operations (exploration, production, pricing, marketing and transportation) are subject to extensive controls and regulations imposed by various levels of government, which may be amended from time to time. Governments may regulate or intervene with respect to price, taxes, royalties and the exportation of oil and natural gas. Such regulations may be changed from time to time in response to economic or political conditions. The implementation of new regulations or the modification of existing regulations affecting the oil and natural gas industry could reduce demand for crude oil and natural gas and increase the Company's costs, any of which may have a material adverse effect on the Company's business, financial condition, results of operations and prospects. To conduct oil and gas operations, the Company will require licenses from various government authorities. There can be no assurance that the Company will be able to obtain all the licenses and permits that may be required to conduct operations that it may wish to undertake.

Environmental

All phases of the oil and natural gas business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of federal laws, local laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions

of various substances produced in association with oil and natural gas operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach of applicable environmental legislation may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of oil, natural gas or other pollutants into the air, soil or water may give rise to liabilities to governments and third parties and may require the Company to incur costs to remedy such discharge. Although the Company believes that it is in material compliance with current applicable environmental regulations no assurance can be given that environmental laws will not result in a curtailment of production or a material adverse effect on the Company's business, financial condition, results of operations and prospects. Given the evolving nature of the debate related to climate change and the control of greenhouse gases and resulting requirements, it is not possible to predict the impact on the Company and its operations and financial condition.

CONTINGENT LIABILITIES

The Company reported that in November 2016, Eagle Road Oil, LLC (Eagle Road), a joint venture entity in which its U.S subsidiary Jericho Oil Oklahoma Corp, owns a 50% interest, was named as one of 27 defendants in a class action petition filed in the district court of Pawnee County Oklahoma. The petition alleges that the named oil and gas companies caused man-made earthquakes through the disposal of fracking wastewater. No specific damage amount is alleged in the action. Eagle Road carries industry standard insurance for operational, general and environmental liabilities. Eagle Road conducts its operations in accordance with industry standard practices and adheres to state guidelines and regulations.

Eagle Road filed a motion to dismiss the case. The motion was heard on July 7, 2017. The motion was sustained in part and denied in part. The claim for ultra-hazardous activity was dismissed and the motion was denied as to the remaining claims. The court required the plaintiffs amend the petition with the photographs removed. Plaintiff's refiled their complaint with the ultra-hazardous activity claim replead as requested by the Court. The Court has ordered Plaintiff's to present evidence to the Court to attempt to establish an ultra-hazardous liability claim on August 23, 2018.

OUTLOOK

The Company's long-term goal is to evaluate and develop oil properties, to seek partners for some of its properties as market conditions permit, and to continue to seek out new opportunities. There is no guarantee that the Company will discover or successfully develop such properties.

PROPOSED TRANSACTIONS

None.

SHARE CAPITAL UPDATE

As at the date of this report, the Company had the following share capital outstanding:

Share Capital	\$ 49,220,294
Common shares issued	126,753,887
Stock options outstanding	7,708,000
Warrants outstanding	26,070,387
Total share capital outstanding	160,532,274

DIRECTORS AND OFFICERS

The Company's directors and officers as at the date of this report are:

Directors	Officers	Officer Title
Brian Williamson	Brian Williamson	Chief Executive Officer
Allen Wilson	Allen Wilson	President
Nicholas Baxter	Benjamin Holman	Chief Financial Officer
Gerald Tuskey		
Markus Seywerd		

On April 23, 2018 the Company announced due to an extended medical leave of its Chief Financial Officer, Robin Peterson, it has appointed Benjamin Holman as interim CFO of Jericho. Mr. Holman, based in Tulsa, Oklahoma, has more than 17 years' experience in accounting and business administration in the oil and gas industry, including senior positions at Apco Oil and Gas International Inc., a former subsidiary of The Williams Companies and WPX Energy. He has been working with Jericho at its Tulsa operational headquarters since November 2017. Mr. Holman is a CPA, with a MAcc, B.S. and BSBA, all from the University of Tulsa.

On January 17, 2017, the Company appointed Markus Seywerd to the Board of Directors. Mr. Seywerd is Chief Investment Officer and Co-Founder of Park Lane Capital SIVAC plc., a London based investment management firm. On May 24, 2017, at the Company's Annual General Meeting, the Company appointed Brian Williamson, President of Jericho Oil (Oklahoma) Corp. to its Board of Directors. On August 21, 2017 Brian Williamson became Chief Executive Officer of the Company, and Allen Wilson remained as President.

FORWARD-LOOKING STATEMENTS

This MD&A contains or incorporates, by reference, forward-looking statements. All statements other than statements of historical fact included or incorporated by reference and that address activities, events or developments that we expect or anticipate may or will occur in the future are forward-looking statements. While any forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business; actual results may

vary, sometimes materially, from any estimates, predictions, projections, assumptions or other suggestions of future performance herein. Undue reliance should not be placed on these forward-looking statements, which are based upon our assumptions and are subject to known and unknown risks and uncertainties and other factors, some of which are beyond our control, which may cause actual results, levels of activity and achievements to differ materially from those estimated or projected and expressed in or implied by such statements. We undertake no obligation to update publicly or revise any forward-looking statements contained herein, and such statements are expressly qualified by this cautionary statement.
